## LEAK DETECTOR

PRODUCT CATALOGUE

**A**

**SIMPLE**  
Easy to use design

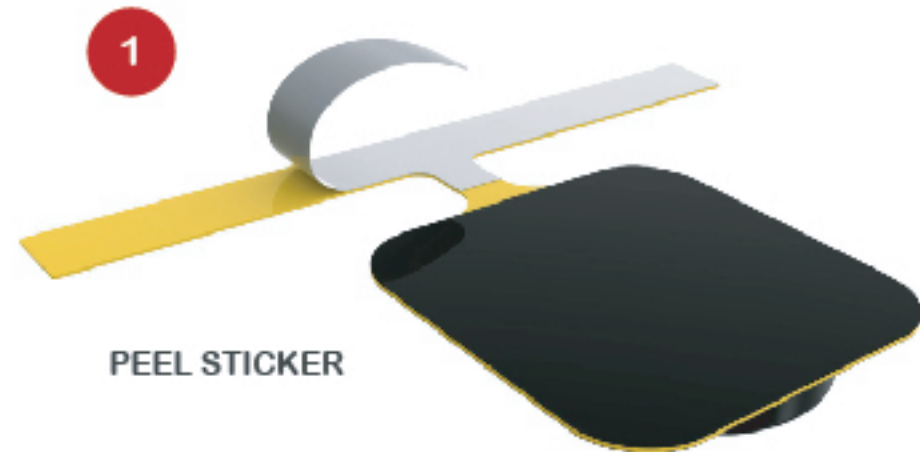

**B**

**EFFECTIVE**  
Low cost leak detection

**C**

**VERSATILE**  
For multiple uses

## HOW IT WORKS

### THE DEVICE :

Designed and developed in the UK in conjunction with academic manufacturing experts and the aerospace and medical devices industry, the leak detector is available in flexible and rigid models.

The detector offers a low cost, versatile solution to water leakage detection for home, office and industry.

The detector has been designed so that it can be fitted easily and quickly and is ideal as a marketing gift for the water and insurance industries, in addition to being a practical solution for building management companies.

## DESCRIPTION

### HOUSEHOLD APPLIANCES

The device can either be slid under or attached to outlet and inlet pipes of appliances to offer protection to hidden leaks that can cause significant damage over time.

### TOILET CISTERNS

'Leaky Loos' can cost those households on a water meter considerable costs over the year and can be difficult to detect; with one of the devices attached to the cistern overflow, an audible alarm can alert to a problem.

### GENERAL PIPEWORK

With its flexible design the detector can be easily attached to most pipes and provide an early warning of trouble.

### SINKS AND RADIATORS

The device can be discreetly and quickly fixed to provide peace of mind.

## WHERE TO USE

### CUSTOM BRANDING:

The design allows for a simple, effective branding message to be attached to the detector.

Additional bespoke branding could also be delivered.
